ICE RINK CAMBRIDGE

With an ice-rink 56 metres long and 26 metres wide, the new Cambridge Ice Arena meets the requirements of the International Ice Hockey Federation (IIHF). The new Ice Arena on Newmarket Road in Cambridge will not only be the new home of the Cambridge University Ice Hockey team, but will also be used by the public for ice skating. About 100,000 visitors are expected to visit the ice rink every year.

LOCATION

Cambridge, Great Britain

CLIENT

Monro White Hilton

CONSTRUCTION PERIOD

2017 - 2019

STATUS

Completed

PROJECT CATEGORY

Sport and Leisure, Public, Glued laminated timber, Cross laminated timber

DETAILS

Wood species: **Spruce**

Volume: **220 m³ glued laminated timber,**
220 m³ cross laminated timber

SCOPE OF SERVICES

Concept & Consulting, Planning, Production, Component Delivery, Assembly, Project Management

PRODUCT / SOLUTION

Glued laminated timber,
Cross laminated timber

The roof construction consists of up to 37 meter long glued laminated timber beams made of spruce (220 m³). In addition, some 220 m³ of HASSLACHER cross laminated timber were used in the project. HESS TIMBER was responsible for the planning, production, delivery and assembly of the timber components.

HESS TIMBER

We assume responsibility for our environment. With every realised timber construction we contribute to the environmental protection as the wood used in construction stores the carbon that the tree has removed from the atmosphere. We are also committed to responsible sourcing of raw materials solely from sustainably managed forests. We guarantee this as a **MEMBER** of **HASSLACHER** group.
