TIBETAN CULTURAL CENTRE

The Buddhist temple, the so-called 'Gönpa', impresses with its clear design language and architecture. The building, which was designed by the renowned architect Benedetta Tagliabue, functions as a place of interaction and spirituality. The project is an impressive testimony to the efficiency of the patented and unique HESS LIMITLESS joint system. It was the technology of the patented on-site assembly that made the economical use of glued laminated timber possible on the island of Tenerife. The HESS LIMITLESS beams, with a length of 55 m, are among the largest glued laminated timber beams ever realised in Europe.

"For wide-span constructions HESS LIMITLESS is the ideal solution with regard to cost efficiency."

– Diego Núñez Jiménez, MADERGIA –

ORT

Adeje, Spanien

LOCATION

Adeje, Spain

CLIENT

MADERIGA

ARCHITECT

Miralles Tagliabue EMBT

CONSTRUCTION PERIOD

2016

STATUS

Completed

PROJECT CATEGORY

Cultural, Limitless,
Glued laminated timber

DETAILS

Wood species: **Spruce**

Volume: **140 m³ Glued laminated timber**

SCOPE OF SERVICES

Concept & Consulting, Production

PRODUCT / SOLUTION

HESS LIMITLESS, Glued laminated timber

HESS TIMBER

We assume responsibility for our environment. With every realised timber construction we contribute to the environmental protection as the wood used in construction stores the carbon that the tree has removed from the atmosphere. We are also committed to responsible sourcing of raw materials solely from sustainably managed forests. We guarantee this as a **MEMBER of HASSLACHER** group.
